Ansell

THINKING OF PEOPLE AND PLANET FIRST

At Ansell, we are committed to creating a safer, more sustainable world for everyone. By prioritising environmental responsibility, safety, and inclusivity we aim to lead by example in our industry.

Discover our ambitious goals and our progress so far in achieving a zero-carbon future, in conserving natural resources and ensuring a safe and respectful workplace.

Zero Carbon Future

The Target

- Net zero emissions for our operations by 2040
- 100% renewable electricity by 2040
- All manufacturing plants to have certified Energy Management Systems (ISO50001) by 2028
- Value chain partnerships and policy advocacy for climate and advancing for transition to zero carbon future
- Zero waste to landfill manufacturing plants
- Use less fossil fuel materials, more recycled and bio-based content materials
- 100% of packaging material is recyclable, reusable or compostable by 2026

Where we're at

- 14% reduction in our operations GHG emissions[1]
- 31% renewable electricity across our operations[1]
- 4 out of 14 plants are now certified ISO50001
- Formally committed to the SBTi to set science-based net zero targets for our entire operations
- 99.8% waste diverted from landfill, out of which 65% are reused and recycled[2]
- 80% of our new products are designed with reduced environmental impact by 2026[4]
- Outer case inner dispenser packaging is recyclable for 97% of our industrial and 100% of our healthcare products

Ansell

Conserve Natural Resources

The Target

Reduce water withdrawals by 35% by 2027

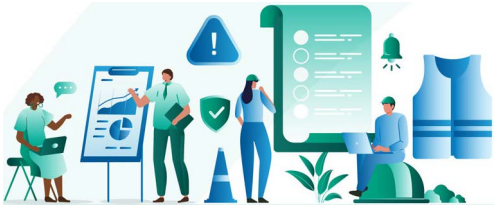
Improved environmental stewardship to reduce depletion and impacts on natural resources

Where we're at

0.27% decrease in water withdrawals from FY23

100% sustainable biomass resourced for our high-pressure hot water generators (HWGs) in Sri Lanka

Safe & Respectful Workplace



Where we're at

Operations worker feedback on safety increased by 145% (tripled from FY21 baseline)

9 out of 14 plants operate a maximum 60-hour work week[4]

72% of in-scope[5] finished goods suppliers and 69% of in-scope raw material suppliers are rated 'A' or 'B'

Ansell Earth

Ansell Earth introduces science-based claims structured across the five product life cycle areas: Material, Manufacturing, Packaging, Use, and End of Use, all of which help Ansell customers make informed portfolio decisions and achieve their sustainability goals.

Material **Manufacturing** **Packaging** **Use** **End of Use**
